Academic Program for Master Degree Candidates in Occupational and Environmental Health

Program overview

This program will ensure that students become experts in the field of Occupational & Environmental Health. The first year is almost entirely devoted to expanding one's knowledge of the field. The second-year focuses on deepening the understanding of the field and the topic for the dissertation is chosen and the associated research plan is written. In the third year, students will finish their dissertations and after defending, they will be awarded the title of Master of Science.

Aim of the program

The Aim of the program is to educate the next generation of Occupational & Environmental Health talent to be able to compete with their peers in the global job market. Through extensive training and research practise, students will graduate and hold the Master's degree enabling him or her to work in organizations in the field of occupational health supervision, occupational health evaluation, and be a researcher on environmental health risk.
