Academic Program for Master Degree Candidates in Hydraulic Engineering

Program overview

This program is an academic program requires good efforts on scientific research, publications and technology innovations. It will ensure that students become experts in the fields of hydraulic engineering, hydraulic structural engineering, water resources, hydrology and relevant geotechnical engineering problems. The first year is almost entirely devoted to expanding one's knowledge of the field. The second-year focuses on deepening the understanding of the field and the topic for the dissertation is chosen and the associated research plan is written. In the third year, students will finish their dissertations and after defending, they will be awarded the title of master of engineering.

Aim of the program

The program aims to educate the next generation of Hydraulic Engineering talent to be able to compete with their peers in the global job market. Through extensive training and research practise, the student will graduate and hold the Master's degree enabling him or her to work in Hydraulic Engineering and relevant infrastructure construction and water resources management areas.

When and how to apply

Applicants can apply starting from January 1st, 2023 till May 31st, 2023. For more information on the documents needed and the application procedure, please visit: <u>http://www.istudy.sdu.edu.cn</u>.

Application for financial support

There are possibilities for getting a scholarship either by the China Scholarship Council (CSC), the local government or through Shandong University. For more information on CSC scholarships, please visit: <u>http://www.campuschina.org/.</u> For more information on local government or university scholarships, please visit: <u>http://www.istudy.sdu.edu.cn</u>.
