

Academic Program for Ph.D. Candidates in Human Anatomy and Histoembryology

Program overview

This program will ensure that students get a solid basis in Human Anatomy and Histoembryology, the various methods of conducting scientific research and the development of professional skills. The first year the main focus will be on expanding one's knowledge of the field and improving the student's ability to deliver high quality scientific research. In addition, a topic will be chosen for the dissertation and the associated research plans will be made. After getting approval from the research committee students can start focusing on their graduation. The second, third and fourth year will focus on research for the dissertation, of which an important part is the publishing of papers in relevant journals.

Aim of the program

To educate the next generation of Human Anatomy and Histoembryology talent that is able to compete with their peers in the global job market. Through extensive training and research practise the student will graduate and hold the Ph.D. degree enabling him or her to work in the most qualified and prestigious jobs related to Human Anatomy and Histoembryology.
