

Academic Program for Ph.D. Candidates in Electronic Circuit and System

Program overview

This program will ensure that students get a solid basis in Electronic Circuit and System, the various methods of conducting scientific research and the development of professional skills. In the first year, the main focus will be on expanding one's knowledge of the field and improving the student's ability to deliver high quality scientific research. In addition, a topic will be chosen for the dissertation and the associated research plans will be made. After getting approval from the research committee, students can start focusing on their graduation. The second, third and fourth year will focus on research for the dissertation, of which an important part is the publishing of papers in relevant journals.

Aim of the program

The program aims to educate the next generation of Electronic Circuit and System talent to be able to compete with their peers in the global job market. Through extensive training and research practise, the student will graduate and hold the Ph.D. degree enabling him or her to work in the most qualified and prestigious jobs related to Electronic Circuit and System.

When and how to apply

Applicants can apply starting from January 1st, 2023 till May 31st, 2023. For more information on the documents needed and the application procedure, please visit: <http://www.istudy.sdu.edu.cn>.

Application for financial support

There are possibilities for getting a scholarship either by the China Scholarship Council (CSC), the local government or through Shandong University. For more information on CSC scholarships, please visit: <http://www.campuschina.org/>. For more information on local government or university scholarships, please visit <http://www.istudy.sdu.edu.cn>.
